Orange County's Credit Union Selects KnowledgePortal360 For Corporate CU University

With focus on member service and compliance training, Credit Union develops CU University with TFactor's enterprise training Platform.

LAS VEGAS, Nevada, January 4, 2008 – TFactor, Incorporated, announced that Orange County's Credit Union serving Orange and Riverside counties and the Long Beach area in southern California has implemented its enterprise training solution. The Credit Union will utilize TFactor's KnowledgePortal360 Learning Management System (LMS), sales and service training in addition to compliance training for their CU University.

Avery Robinson, Orange County's Credit Union AVP of Human Resources, expects a significant impact from the KnowledgePortal360 system: "Our members demand and our staff provide first class service. Our training consists of online and in-class instructor-led training so we need a training system that will help us manage and track our blended training program."

Avery added, "Our selection of TFactor for this project was easy. They have an extensive knowledge of our industry and provide the most powerful and economical solution available. We are expecting exciting results."

KnowledgePortal360 is a comprehensive Learning solution that combines learning content hosting and delivery with a robust authoring capability and complete registration, testing, and tracking functionality. TFactor has leveraged the economy and power of the Software-as-a-Service (SaaS) business model to enable organizations to cost effectively implement a custom "Corporate University" that is bundled with off-the-shelf compliance courseware that is updated as needed.

TFactor President Terry Omojola credits the project's success to the Credit Union's training staff and company's user friendly Learning Management System. "Orange County's Credit Union is particularly well-suited for a Corporate University because of their multiple branch offices and diverse training needs, including mandated compliance certifications. KnowledgePortal360 meets the needs of credit unions with its user friendly interface and powerful features to administer online and classroom training."

The credit union will also develop custom courseware for its unique requirements using KP360's user friendly integrated course builder functionality. Whether the training is delivered online or through a classroom or web-conferencing modality, KnowledgePortal360 registers, tracks, and assesses each employee's progress through the curriculum.

About Orange County's Credit Union

Founded in 1938, Orange County's Credit Union is a member-owned, not-for-profit financial institution with more than 82,000 members who live or work in Orange and Riverside Counties, California, and the neighbouring communities of Long Beach, Signal Hill, Lakewood, and Cerritos. With assets of more than \$865 million, Orange County's Credit Union is ranked in the top two percent of all credit unions nationwide.
